We have some Items of interest from Washlogion, this morning. The Minnesota Southers, tired of waiting for the formal admission of the State into the Union, have claimed seats in the U. S. Senate. There is no likelihood, however, of their being received, until the Lecompton Swindle is consummated. Gen. Quitmun has introduced a bill in the House, authorizing the President to call out four Regiments of Volumtoers, for service in Utch. It will probably pass, instead of the Senate bill to increase the

The State Transury. The Madison Journal, of Wednesday, contains a communication from the State Tressurer. In reply to a resolution of the Senate, calling for information as to the amount thus lar pell of l the State tax, the proportion of gold and silver paid in, and the amount of tax yet unpaid. It appears that up to the 20th inst., \$185,800, of days. the \$231,279 (State tax for 1857 and orrearages) have been paid into the Treasury; that \$120,252 of this amount was in coin, \$24,883 in currency, and \$36,668 in State serip ; and that \$152,-956 is will due and supaid. From Milwankte County only \$668,84 has been received, leaving a balance due of \$32,680.

The Treasurer, Mr. Hastings, is discharging the duties of his office to the accoptation of the Mil. & wat... Legislature and the People. The Madison Jourrial Bays:

THE PACIFIC RATHURAD,- The Washington correspondent of the New York Evening Post, states that a mejority of the Scuate Committee on the Pacific Railroad, had agreed on a toport in favor of the central route, according to the recommendation of Senator Douglas, but this plan coming to the cars of the President, be at once manifested a greet deal of irritation, and declared that it would never do to start the road from Kansas or Nebraska; it must be built from El Paso to Fort Yuma. That was the only route he considered practicable-a route which to use the words of Senator Dovolas, begins nowhere and ends nowhere, and the expense of hauling the iron for which will cost more than enough to grade the whole road by the central

DISGRACEFUL ASSAULT .- A cowardly and disgraceful assault was made upon Jons Wxsrwowrs, Mayor of Chleago and editor of the Democrat, in one of the balls of the Tromont House. on Wodnesday evening, by a Mr. T. J. B. FLIRT. It appears that some testimony taken in a Police case and published in the Democrat, reflected unfavorably upon Mr. FLINT; whereupon he undertook to avenge himself by caning the cilitar. He was foiled, however, in the attempt, after striking Mr. Wantworth two or three compara tively harmless blows. The Chicago papers unite in denouncing the assault as a disgraceful out-

UNDER DISCIPCIAE.-The loyal P. M. at Afton. Rock County, vents his indignation, through the Beloit Herald, at the Janesville Democratio Standard, for declining to support the Lecompton Swindle. The Standard retorts upon the P.

Oul Purger.-The Post Office at Atton is worth \$80 a year. The Post Master at that hamlet is Charley Pulker. In the intervals of his official toils, Charley sometimes "airs his rhet-orio." This is the individual who, over the classical name of "Pulker," has recently come to the rescue of the f.ecompton swindle, in the Bolott Herald, and with sounding adjectives has denounced the oditor of this paper for not "bowing the knee to Baal." We have no animosity against Charley on this account. We presume this little squib of his is one of the "necessities" of his official position. It seems to us, however, a very large amount of indignation for a very small amount of money. At this rate Post Master Brown would be an incipient volcano, and Post Master Sharpstoin an active Vesnvius,

A TRACEIR ON TRIAL FOR AN ALLEGED BRITTAL ASSAULT UPON A SCHOLAR IN A DISTRICT SCHOOL A case which is attracting considerable inter est has occupied the Circuit Court for the pas two days. It is the case of the State of Wisconsin against Jared Thompson, charged with having committed an assault with intent to maim. The facts in the case, as we gathered them from hearing one or two witnesses exam-Our Similating-Finewall to it. - The warm | ined, are these :- The defendant, Jared Thompson, is a school teacher in one of the district schools in the town of Lake. He is a young feace to the teacher by cutting a hole through one of the desks. The teacher, seeing what the boy had done, came up to his seat and asked that. The boy replied no, he did not. The teacher then told him he would punish him, and that he might prepare for a thrashing, or some. In a brought the values of that day. Western Gault thing to that effect. To which the boy again Flour being in large capply and of usually low grade, has

thing to that effect. To which the boy again made some impertinent reply. The teacher then left him, and heard several recitations, until near the hour of dismissing the school in the afternoon, when he sent one of the scholars to cut him a whip with which to punish teacher. Thompson broke them, and threw them out of the window, saying that he did not use such things in his school. The boy went out rather more extensive dimensions, and the teacher, going up to the boy Razeo told him to take off his coat and prapare for a flogging. The boy took off his coat, and Thompson then told him to being 110 tens, on London account, at 51s. For new take off his vest. A brother of the boy, named there is some inquiry at 52souta68s. Daniel, at this juncture interfered, and told his brother not to take off his vest. The teacher then turned around to Daniel, and told him if he don the market is flat, at 5% 6d for Fetersburgh, Y. C., said that again he would throw him out of the school house, head first. Whereupon Daniel got his spunk up and replied to the teacher tauntingly, "You can't do it." The teacher for ther change. A moderate demand has sprung up for then jumped over some seats to where Daniel staple goods, domestic and imported, and prices are firm, was sitting, and taking him by the collar attempt. was sitting, and taking him by the collar attempt

ed to put his threat into execution. Daniel held the seat, and Thompson then Daniel heid the seat, and Thompsen then struck him several blows upon the side of the head. Daniel then get up and kicked the teacher, who pulled him out of his seat, and struck him, it is said. Daniel then pitched into him, and the supply are pretty will balanced. Thompsen, and Thompsen pitched into him, and a regular melce ensued, in which Daniel had two of his front teeth knocked out, and it is asserted that Thompson stamped upon Daniel's face with the heel of his boot, while the latter was lying in the sisle, thus breaking out his teeth, and with intent to maim. The testimony, to say the least, was very unsatisfactory as to Thompson's having stamped upon the boy's face, and the most likely inference would be, that in the fracus Daniel knocked his teeth out by striking

upon one of the desks or seats. COBB, aged 17 years, 6 months. It was testified that Daniel said the next deupon being interrogated, that he did not see how Thompson could have knocked out his teeth, without stamping upon his face, which shows

that he had some doubts about the matter himself, and yet some of the scholars testify to havfrom the Columbus Journal, purporting to give ing seen the teacher stamp upon Datiel. It seems that some of the scholars were rather rebelliously inclined, and had determined to bid defiance to their teacher, who was probably rather overbearing, as young teachers usually are .-Some of the boys were rather rough fellows, and no doubt needed an eron rod to keep them in order. The boys the next day, it appears, determined to avenge the wrongs of their toothless school fellow; and went to the school house in a squad, gave the teacher a drubbing and after serving him as he had Daniel-that is turned him out-took possession, and went to keeping school on their own account. After a time tranquility was restored, but the parents of Daniel, thinking the teacher had knocked out the boy's teach with the intention of maining him, made a complaint against him. Considerable interest is felt by the friends of both parties in the neighborhood of the Town of Lake, in the result of the trial, a great many of whom, including a number of the rebellious scholars have been in attendance at

the Court House. The defonce in this case is very ably conducted by Byron Paine and L. Wyman, and the counsel for the prosecution are the District Attorney and S. Park Coon. The case had not been given to the jury quite late last evening.

The Other Side. -- Yesterday we published an article upon the subject of the Mil. & Watertown R. R. difficulty, tather favoring Mr. Freeman's course. We did not then claim to be acquainttrust you will be willing to undo the injustice to and with the justice of the case. To day we give place to a very plain statement of the matter from Mr. Jackson, a gautlaman widely known, and whose veracity will not be questioned.

BY MAGNETIO TELEGRAPH XXXVO Congress-First Session.

WASSINGTON, Feb. 25. d Mr. Mason presented resolutions asking information as to the condition of the navy for many years past, also felative to captures of vessels and prize money during the late war. Mr. Crittenden presented a letter from Mr. Shields, and moved that he take his seat as Senator from Minnesota. The latter argues that Minnesota is a sovereign State and one of the members of the U.S. It refers to several precedents for the guidance of the Senate in the matter. A discussion took place as to whether it was a privileged question. Mr. Pugh thought it was, but contended that Minnesota had not so far complised with the terms of admission as to entitle her. Senators to be sworn without some action by Congress. Mr. Orithenden sent up Mr. Shield's predentials.

House,—Mr. Quitmas from the Committee on Military Affaira reported a bill authorizing the President to call out, as occasion may require, four additional regiments of volunteers. Mr. Quitman expressed his opinion that this bill was more indicative of public sentiment than any yet presented! Action thereupon was postponed till Wednesday. The Matteson exputsion case was called up. Mr. Harrison, of Illinois expressed his firm belief that the House had power, and it was its duty to pass the resolution and do it at once. All the facts in the case were in the form of depositions with which members were probably famillar. nation as to the condition of the navy for many

Mr. Keitt said that on a former occasion, he had moved, as an act of justice, a postponement of the case, having been informed that Mrs. Matteson was sick. He had since learned that the statement was fabricated. Some of the accounts say that she was sick, and others that she was enjoying better health than ever. He read a statement from the family physician, that Mrs. Matteson had not seen a well day for aix months past, and during the last six weeks had suffered more than ever.

months past, and during the last his weens and suffered more than ever.

Air. Seward said that a more important quantion could not be presented. He voted for the expulsion of Air. Matteson, because he shought is just, but would defend his constitutions rights in the House. The last Congress had exhausted its constitutional power over the subject. Where is the law in the constitution prohibing the people from election and man they choose? Ox Tall Soup is served up with other refreshments, at a free lunch at the Golden Gate Saloon and the rules of the constitutional rules, and the rules of the common law, namely; that no man shall be punished twice for the same of-fence. Mr. Matteson had already been tried, convicted and punished.

way in which the resolve of the House to have the Lecompton frauds investigated, has been checkmated by Stephen's majority of the Sclen Jommittee:

Committee:

Mr. Harris, of Illnois, Chairman of the Invostigating Committee, is instructed only to inquire whether any documents are obtainable at the Departments which have a hearing on the matter before that Committee, but he is not to get whatever documents there may be for a prose-cution of the investigation immediately; he is only to make inquiry, to report what he may learn to the Committee at its next session, a week hence.
The Interior Department has made reply that

they have no papers of the character cought and the State Department has made no response. It is more than probable, then, that the records of the election remain in Calhous's possession, to be manipulated into the form, and shape demanded by the circumstences of the hour. It is expressionally permissing to expressions the first manued by the firedmateness of the hour, it is exceedingly perplexing to comprehend the fairness and convenience of an election canvasser going, after the polle are closed, over one thousand miles away to make his returns. What would a Philadelphian thick of an election officer going to Panams to make his return of the votes cast, and the persons elected? The construction given to the adjournment of the Committee to Wednesday is, that nothing may be done until the Senate have acted on the measure before them, and sent it to the House, when it is to be taken up, and the effort made to put it through under whip and sour.

MILWAUKEE: PRIDAY MORNING, PEB. 26.

The fiand Grant-The Investigation. The Madison Argus, of Wadnesday, concludes a brief notice of the progress of the Investigation by the Logislative Committee, with the ful-

lowing reference to the Land Grant itself: It is our dollborate oplaion that the State should resume the Grant—take back the millishould resume and Grant—take back the millions of acres that were worse than given or thrown away, and either surrender the entire grant to Congress again, or give it to new and

We do not believe that the State has the power to recall this Grant, and do not think that it should do so, if it had. The new management of the road is presecuting the work with energy and success; and there is every prespect of its speedy completion to La Crosso. This is a matter of vital consequence, not only to the City of Milwaukee and to the State at large, but to the numerous stock and boudholders, and the farmers who have morageged their homestends to help along the enterprise. To recall the Grant would be to deal a fatal injury to the credit of the Company, and entail heavy loss and possibly ruin upon thousands of innocent parties, who have invested largely in this road. Nor can we see any possible good to be accomplished by such action. So long, therefore, as the present managers of the road continue to prosecute their enterprise in good faith and with such fair prospect of success, we trust that they will not be molested, or hindered in their labors by any unnecessary and nuwarrantable interference on the

Mr. Kilbourn and the Legislature. The following is the communication, sent in by Mr. Kilbouns to the Assembly, after the declaion of the Supreme Court in the Habras Cor.

To the Honorable Assembly :

I had proposed a statement of my views of the constitutionality of the position which it seemed to be my duty to take in declining to answer the questions propounded to me by the investigating committee, and in regard to the constitutional power of this legislature, touching the constitutional power of this legislature. constitutional power of this legislature, fouching the acts of persons before a previous legislature. It was my design to lay that statement, together with my reasons, before this honorable Assem-bly, on Tuesday, the 6th last, which time had been fixed upon for my answoring, to show cause why judgment should not be pronounc-ed against me for contempt; but application to Supreme Court for a writ of habons corpus, for the purpose of bringing the whole question of constitutional power before that body, pre-vented my coming before this house at that

time. The court having announced its opinion to the effect that the legislature has the right to make the proposed investigation, I submit to the decree of the court and to the power of this house, and announce my readless now to go before the Committee and answer such questions at they want any copies to sake and threeby house, before which no real contempt of this house, before which no real contempt was in-As I then stated to the committee, my reason for declining to answer was not that my answers.

night criminate any porson, as it seemed to be supposed they would, but for the reason that I believed the simple circumstance that such as investigation as was thought necessary to be made by the legislature, would have an injurious tendency upon the credit of the La Crosse company, and upon the progress of the work; and that no public good could grow out of it. In thus respect, my opinion remains unchanged.

Isving made all the resistance to its progress that I could lawfully do, I feel that I have ideas on the country; and

that I could lawfully do, I feet that I have those may duty to the company and the country; and now submitting to the necessities of the case, shall cheerfully comply with the requirements of the Legislature, by stating all I know, and leaving consequences to take care of themselves.

Respectfully submitted,

BYRON KILBOURN.

This is undoubtedly an unintentional error, as it is well known the city contains more than that number of thousands of inhabitants .-Mr. Morrell expresses the opinion that the proposed governmental plun for the construction of ship causi between the Ottawn river and Lake Huron will be carried into offect, and in that case, we shall become into intimate commercial acquaintances. The best description perhaps that we can give of Ottawa, is embedied in the following letter from Mr. Morrell to the New

The question of a permanent seat was for some time before the Colonial Government, but the ally referred to the imperial or Home Government to decide—the competing candidates for the favor being Quebuc, Montreal, Ottawa, Klugston and Toronto. Ottawa, the most contral, has been also that the the former, and a disputely received. selected by the Queen, and a dispatch received by the Colonial Government to that effect. To the best-informed in Canada the probability of this selection has been known for some time past and has been rendered still more likely by the movement for the american of a period of the greatest nation on the earth—that, with France lines are the control of t Hudson's Bay Compuny's possessions to the Ca-nadian jurisdiction by the Provincial Parliament and which is likely to take place.

Until 1854 this place was known as "Bytewn"

Until 1864 this place was known as "Bytown" the talkative Gallican did not in his heart boderiving its original name from the founder, Cot. By—who was commissioned by the English Government in -1327 to superintend the construction of the Ridean Canal, connecting the Ottawa River with Lake Ontario, thereby opening an inland water communication with the Upper Lakes, serving the double purpose of inland commerce in times of peace, and the means of transmitting troops, amaunition, provisions, &c., unnotested in time of war—but was then changed by act of Provincial Parliament to that there do English and the English is at this moment gives the first of the English and the English is at this moment more rife than ever, and any visible eximple the constitution of the west that the constitution of the c byper large, serving the device particle of the means of transmitting troops, ammunition, provisions, &c., unmolested in time of peace, and the means of transmitting troops, ammunition, provisions, &c., unmolested in time of war—but was then changed by act of Provincial Parliament to "Ottawa Gity." The city is situated on the west bank of the Ottawa River, on a high bluff bank of perpendicular rook, and is divided into what is termed the Upper and Lower Town by the Rideau Canal which enters the Ottawa through eight or nine massive and symmetrical stone locks. On the extreme point or promontory of the Upper Town the Government has always reserved a plot of ground, on which the buildings for Government, and from which pont the view will be ungnificent, taking in as it does the cellugs for Governmoutel purposes will now probably be cructed, and from which point the view will be insgnificent, taking in as it does the col-obrated Chandiero Falls, which are generally acknowledged next to Klagars in imposing grau-deur and beauty, and also an island below cov-ored with factories, mills and timber slides, with a fine scope of the surrounding country. Be-

otto from the control of the falls.

Ottawa is distant from Montroal 126 miles, from Quebec 206, from Toronto 238, and from the frontier at Ogdensburg 54 miles, by which it is connected by rallroad. Steamers ply daily between Montreal and Ottawa, and a railroad is between Montreal and Ottawa, and a railroad is also under charter from Montreal via Ottawa to Georgian Bay on Lake Heron; also, one now in course of construction from Brockville on the St Lawrence, north, striking the Ottawa River from 50 to 75 miles above Ottawa. The Government has caused a survey to be made the past year for a ship canal via this route to Lake Liuron, which, if carried into effect, will open a channel for the north-western trade, and allow the surplus produce to flow to the seaboard in bulk. Should this be carried into effect, Ottawa may yet become the most populous city in Canamay yet become the most populous city in Canada, uniting the advantages of an agricultural country on one side with the inexhaustible forcast of timber on the other, with unsurpassed water power. The Hull iron mines are also being worked successfully at present within seven miles of the city. The principal buildings are built of stone, of which there is abundance in the immediate vicinity, similar to that of Mon-treal. The city new contains between 12,000 and 16,000 inhabitants, is lit by gas, and con-

tains some fine public buildings.
Ottown has been advanced by its advantageous position, being the key to the lumber regions, with other advantages; thus far, but, since it has received its share of Government nationage it may now look to a brighter future, and I may safely predict that it will not only be the official centre, but will rapidly be one one of the main attractions of the Northern tourist for planting and programme to the second of t for pleasure, possessing as it does the greatest variety of natural aconory of any city in the Province.

INTERESTING FROM FRANCE.

Iostile Feelings of the French People and Army toward England. Pants, Feb. 4 You will have learned from other sources that other side of St. George's channel. But it is a fact that the English generally have taken so high an estimate of the character of Napoleon, that it will require much move than any persificage of this kind to disabuse them. There is no doubt that the Emperor sees and thoroughly acknowledges this, and knows the solid advantage of the second of the sec acknowledges this, and knows the solid advan-tage that accrues to him from if. If in that temple of ellence in which his heart is coshr ined he has

At the same time this was no coasion when I believe he found it absolutely impossible to stay the predominent sentiment of jealousy and vindictiveness against the perfect and and regulate their dementic institutions in their every phase of French society, but more especially in the array of France. It requires a long large parameter of Kanasas and Nebraska by the organic law, adheres alike in the people of residence in this country to appreciate the ex-tent of this feeling, and the rooted nature of it in the French character. The natural politeness of the nation is seldom tempted from its propriety by the ordinary English traveller, who, with plenty of loose cash, charmed by the thousand and one novelties that surround him and attend by her side, she might give laws to the universe, by her side, she might give laws to the during set, and that English particism and English liberty was the Frenchman's never ending source of envy. Bah! The whole was sheer humbug.—
The talkative Gallican did not in his heart believe one syllable he was uttering, and if, at that moment, was had been declared—no matter that the Gayanapath—alth English he would

that hatred to Eugiand and the English is at this moment more rife than ever, and any visible expression of it almost the only watchword capable of uniting every section of the community. As the French nation becomes more important in the eyes of Europa this hostility becomes less and less disguised, and though it is never safe to make political prophecies, I should look on him as a bold man who asserted that the day was far distant when ever acts would demonstrate it.

The by the intrigues and the gold of England? The aversion we have always entertained for this Power has no other origin; and when we believe an alliance with it to be impossible, it is because we conceive that France cannot connect hersel sincerely with that immoral and guilty policy:—
As England is unable to conquer by the force of arms, she profits by revolutions which are excited by her to seize on territory for strategic

points, which are valuable to her plans of inva-sion. This is her secret; she seeks to obtain by cumning what her military valor could not obtain for dev.

A MISER'S PRAYER.—The following singular prayer was made by John Ward, of Hackney, England. The document, which was found in Ward's own band writing, might be called the misor's prayer. It is one of the examples on record of men combining in themselves the utmost faraticism with the foot of the labeling of the manufaction with the foot of the same faraticism.

msor's prayer. It is one of the examples on record of men combining in themselves the utmost fanaticism, with the total abstinence of anything like moral feeling.

"O Lord, thou knowest that I have nine estates in the city of London, and likewise that I have lately purchased an estate in fee simple in the county of Essex; I beseach the to preserve the two counties of Middlesex and Essex from fire and earthquakes; and as I have a mortgage in Herifordellire, I beg of thee to have an ope of compassion on that county; and for the rest of the counties, thou mayes deal with them as thou are pleased. O, Lord, enable the Banks to answer all their bills, and make my debts on good men. Give a prosperous voyage and return to the Mermaid sloop, because I have insured it; and as thou hast said the days of the wicked are but short, I trust in thee that thou wilt not forget thy promise, as I have purchased an estate in reversion, which will be mine upon the death of the proligate young man, Sir I. L.—

Keep my fluids from sinking, and preserve me from thieves and house breakers; and make all my servants so honest and faithful, that they may attend to my interests, and never cheat me out of my propaget night or far." may attend to my interests, and never cheat me out of my property night or day."

LIVE AT YALE COLLEGE.—From the time whoreof the memory of man runneth not to the contrary, a foud has existed between the town boys and the college boys. Each college gentleman must have a light; hence, every four years New Haven is turned into pandemonium. These battles often intercept college exercises for days; bullies are chosen by each class; clubs and other weapens are procured, and the student forces are regularly organized for war. The cry of fire at midnight, has not half the terrors for the slumberers in the "Elm City" as has that aminous student ery of Yale! Yale!! Yale!! The rush of students to secure their brother in the hands of the Philistines, has more terrors than an invading army. These college collisions, somehow, oftenest occur with the boys who run with the machine. As long age as '30—if our memory is not at fault—one night of a three days light, the students, by dint of more is sualon," were kept in the college yard by the faculty, when a "squirt" was hauled up in the vicet in front and brought to bear on the students. With memory's eye we see the "bully" of the sophomore class and his "body guard" make a sortle for that machine. The fire engine never did service after trying to "put out" the college boys.—Cleveland Herald.

I do horeby certify that I have been using Profusso

J. De Grath's Electric Oil, 39 South Eighth street, Philidelphia, for Spinal Affection, a discase of twenty-two years standing, with greater relief than from any of the housund applications I have ever made use of. I say his with more confidence of its virtue in this particular lisease, since having beard another case in our city, of our years standing, which was instantaneously relieved by application of De Grath's Electric Oil. I write this for the beneat of those unfortunate persons everywhere who may be s. Gering from this classics, and as a debt I owe frof. O. DuCrath for having found out stibh actinov-ery. You that have not got it, write for it-get it by all muons, if you wish to get relief. It may be necessary to any that I have no interest in the selling of De Grath's Electric Oil, and that the Professor is a stranger to me Slectic Oil, and that the Processor is a stronger to the but that I shall always recommon him with gratitude.
